Roman Semenov

Junior Javascript Developer

- roman@semenov.tech
- https://t.me/pomah3
- https://github.com/pomah3

Skills

- JavaScript, TypeScript, Python, C++
- React, NodeJS, Django, Docker, Git, Bash
- Basic knowledge of network protocols, Linux server administration
- Basic competitive programming skills (algorithms, data structures)

Education

ITMO University   2020–2024
Information and communication technologies   Currently in second year of studying

Experience

DevExpress   2021 – Present
JavaScript, TypeScript, React   https://github.com/DevExpress/DevExtreme

DevExtreme — is an open-source UI component libriary. I am responsible for DataGrid and TreeList widgets, GitHub repository provides you a way to see my contributions.

Projects

Websocket Tic Tac Toe   2021
NodeJS, Express, VueJS   https://github.com/pomah3/tictactoe

It's training project written for learning WebSocket and VueJs technologies. When player opens main page, he is put to the queue, and when rival is found game starts.

Edu.tatar parser   2019
NodeJS, Express, VueJS   https://github.com/pomah3/edu-tatar-parser

It's training project written for learning how parsers work. E-diary service of my region named 'Edu.tatar' doesn't provide API, so I've made my own by parsing their website.

Mind   2018 – 2019
PHP, Laravel   https://github.com/pomah3/mind-laravel

This is e-school service for my lyceum. I was responsible for all backend part, including architecture, API development and CI/CD organisation.

Achievements

- Regional stage of Russian National olympiad in Informatics; 2020; prize-winner
- All-Russia project competition "Big Challenges"; 2019; winner
